What's New in Books

SPE publishes a wide range of books, including textbooks, monographs, and reprints, written by leading experts in the upstream oil and gas industry.

Acid Stimulation

Syed A. Ali, Leonard Kalfayan, and Carl Montgomery

SPE's latest book, *Acid Stimulation*, ensures a comprehensive and up-to-the-minute presentation by an author team of 19 subject matter experts, all at the forefront of the development of acidizing technology. Each chapter delivers an authoritative view of the key areas of acid stimulation, providing an important resource for anyone who designs, analyzes, and/or improves acidizing treatments.

SPE Publications Now Available On-the-Go

To read the latest industry news and technologies where and when you need it, two SPE publications are now available in digital-only format for 24/7 access.

Oil & Gas Facilities®

SPE has redesigned *Oil & Gas Facilities* online, enhancing the biweekly newsletter and providing more opportunity for social engagement, while remaining focused on what matters in projects, facilities, and construction content.

The Way Ahead™

Now, great soft skills information isn't limited to SPE young professionals. *The Way Ahead* will soon be available to all SPE members and in digital format. www.spe.org/twa

Member Benefits to Help You Today and Tomorrow

Members in Transition Toolkit

Through every industry cycle, SPE is steady and supportive. The Members in Transition Toolkit provides information, free or discounted resources, and programs to assist you during the current downturn. Take advantage of this toolkit and take control of your career.

www.spe.org/members/transition

Drilling and Completions Discipline Split

To stay current with industry trends, Drilling and Completions are now two separate disciplines. Several secondary disciplines within these disciplines, as well as Production and Operations, were also added or reassigned. Help SPE improve communications to you by updating your discipline within your profile today.

www.spe.org/go/update

Technical Reports

Technical reports address areas where SPE membership and the public would benefit from understanding current technology and challenges. Each report is the result of broad-based input from subject-matter experts. All members have the opportunity to review and comment prior to the finalization of the report, which is then approved by the SPE Board of Directors prior to publication.

In 2016, SPE released a new technical report:

- Guidance for Decision Quality for Multi-Company Upstream Projects

www.spe.org/publications/techreports

Technical Sections

SPE technical sections are communities of SPE members that share ideas, promote competence, and develop projects related to their technical interest. They meet virtually for the most part, but are encouraged to hold a face-to-face meeting at least once a year.

SPE formed a new technical section in 2016:

- Geomechanics Technical Section

www.spe.org/industry/technical-sections

Cost-Effective Professional Development

Competency Management Tool

Access your skills gaps with the SPE Competency Management tool. It now has 41 E&P job competency models to choose from and includes both technical and soft skill competencies. Benefit from this free, members-only service by completing your self-assessment and learning plan today!

www.spe.org/training/cmt

Training for Any Budget

From live classroom to online instruction, SPE offers a wide range of training resources for any budget, schedule, and location.

Through our expanded in-house training program, SPE can bring leading industry experts into your facility to train your staff, saving your company valuable time and money.

www.spe.org/training/in-house

And SPE continues to add trending topics through live and recorded webinars. Webinars are free, courtesy of the SPE Foundation.

Giving Back to the Community

SPE Cares

As SPE's flagship event, ATCE is a great opportunity for members to give back to the community that graciously hosts us for the week. Therefore, SPE is launching a new initiative known as SPE Cares. The SPE Cares Work Group encourages community service and networking among members from around the world. For the program's launch during ATCE 2016 in Dubai, SPE Cares will conduct a "Give a Ghaf" Tree Planting Program to help preserve the tree's cultural and ecological heritage.

About the Society of Petroleum Engineers

The Society of Petroleum Engineers (SPE) is a not-for-profit professional association whose more than 168,000 members in 144 countries are engaged in oil and gas exploration and production. SPE is a key resource for technical knowledge providing publications, events, training courses, and online resources at www.spe.org.
